

PERFORATED DRAIN MAT

Specs

4' x 50' (50 lbs each)

Creates open-air space voids that allows urine and other liquids to be washed down through the turf and infill

Thickness (ASTM D-4716) 0.40 inch

Flow (ASTM D-4716) 21 gallons per minute per foot width

Made in the USA

Features

The Perforated Drain Mat consists of a polymeric sheet cusped under heat and pressure to form a high flow, high compressive strength dimpled drainage core. The core is available as an impermeable sheet or punched, based on application. Impermeable core works well on slabs/indoor surfaces as it protects urine from being absorbed by the concrete.
